

BITNET offer for Two Way Satellite Services based on DirecWay Products

Prices for the Romanian market – March 2007

Hughes Network System Solution based on **DirecWay** terminals is designed for **private individuals, small businesses** and now also for professional ISP and Corporate Applications.

As of December 2006, BITNET offers the new and spectacular two way satellite services platform HN7000S, as the new terminal for professional use and services without limitation.

The HN7000S terminal provides absolutely unique service capabilities, with up to 1,6 Mb/s uplink and 121 Mb/s down load capability, this terminal has a price performance level which is unmatched in the industry.

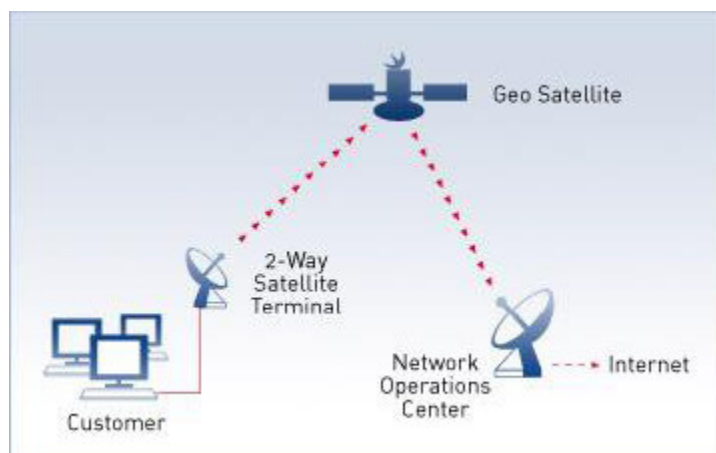

The HN7000S solution with the new high end professional grades of service is also an ideal solution to provide community systems, where the HN7000S satellite terminal provides the broadband connection to the internet and where the IP signal is shared by a local community by means of distribution of the IP signal via a WiFi or WiMAX wireless network or by means of some other distribution network.

In case you need a broadband connection to internet and there is no terrestrial way of getting it, then **Satellite Technology** is the right solution for your needs.

Advantages of satellite technology:

- o Always-On Internet Access (24/365)
- o Broadband asymmetric connection optimized for browsing and e-mail
 - o Full geographic coverage - no constrains
 - o You move, your connection to internet moves with you
- o Optional HNSE services such as Voice over IP and SSL VNP

The picture below explains the technology of the satellite connection to internet.

Hardware Description and Pricing

The terminals are delivered as a set consisting of an outdoor and an indoor unit. The outdoor unit includes antenna (size depending on the location of the site), feed support, azel-head and RFU head. The indoor part includes satellite gateway, receiver and transmitter module and a router.

Our current standard HN7000S offer:

HN7000S

Supports up to 50 computers

Reseller price 89 cm dish

1.049 EUR (min 5 units/order)

Reseller price 120 cm dish

1.099 EUR (min 5 units/order)

End user price 89 cm dish

1.149 EUR (1 unit/order)

End user price 120 cm dish

1.199 EUR (1 unit/order)

*All Prices for equipments are excluding VAT and
Ex-works UK (shippment not included).*

Antenna sizes for all terminals, depending on location.

In Romania:

- o 98 cm
- o 120 cm

For all terminals:

One time Set UP Fee: 200 EUR

One time Public IP Address: 75 EUR each
